The authors regret that the text describing the filtering of the RNA-Seq data contains an inaccuracy. We would like to correct this information in two places within the manuscript.

In the Materials and Methods section 2.5, 6th sentence, it should read: “Here, 4115 differentially expressed transcripts mapping to 4036 unique Smp gene identifiers were classified.”

In the Materials and methods section 2.6, 10th sentence, it should read: “To illustrate an overview of the genome locations and differential expression levels of the 4057 Smps (4115 transcripts) in the filtered RNA-Seq dataset, a Circos plot (Krzyszowski et al., 2009) was generated using the *S. mansoni* genome v 5.2.”

The authors would like to apologise for any inconvenience caused.
